

AutoTask-UI-教程说明

The screenshot shows the AutoTask-UI software interface with four main sections:

- 1. 新建任务 (Create Task):** This section shows the task list on the left and the configuration panel on the right. The configuration panel includes fields for task name (AI自动回复2), current status (已停止), execution mode (立即执行), scheduled time (15:50:10), repeat interval (0分钟), repeat count (5), and a step configuration table. The table lists various operations like mouse clicks, keyboard inputs, and AI responses.
- 2. 选中任务 (Select Task):** This section shows the task list on the left where "新任务 5" is selected. The configuration panel remains the same as in step 1.
- 3. 根据具体任务配置步骤 (Configure Steps for Specific Task):** This section shows the step configuration table for the selected task. It includes columns for step type, description, parameters, and delay (秒). The table lists steps such as left-clicking, right-clicking, and keyboard inputs.
- 4. 保存 (Save):** This section shows the save button in the bottom right corner of the configuration panel.

步骤包含如下方式 根据自己的任务顺序配置

This screenshot shows the "Configure Step" dialog box with the following fields:

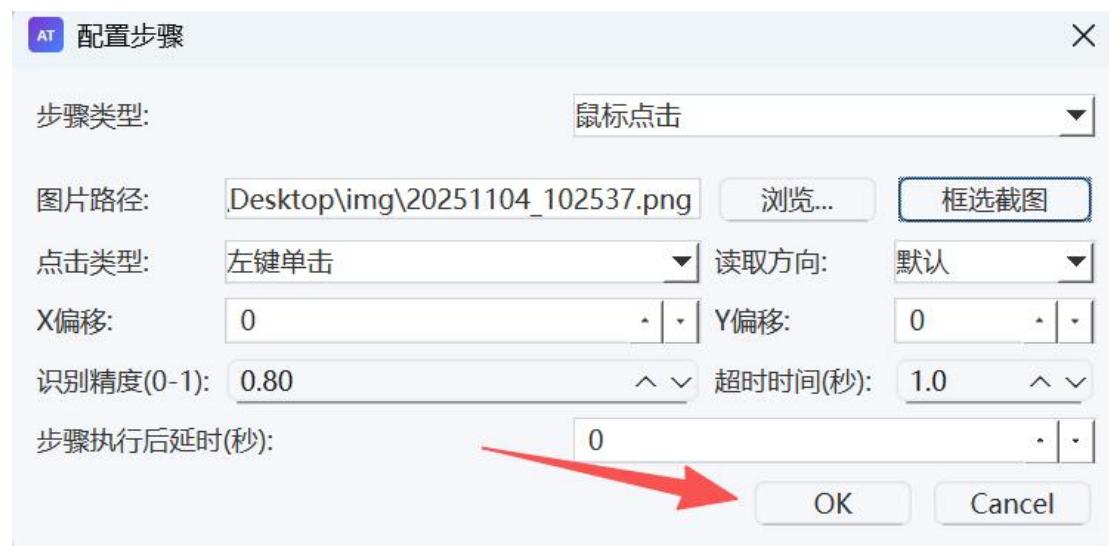

- 步骤类型 (Step Type): 鼠标点击 (Mouse Click)
- 图片路径 (Image Path): (empty)
- 点击类型 (Click Type): 左键单击 (Left Click)
- X偏移 (X Offset): 0
- 识别精度(0-1) (Recognition Precision): 0.80
- 步骤执行后延时(秒) (Step Delay): (empty)

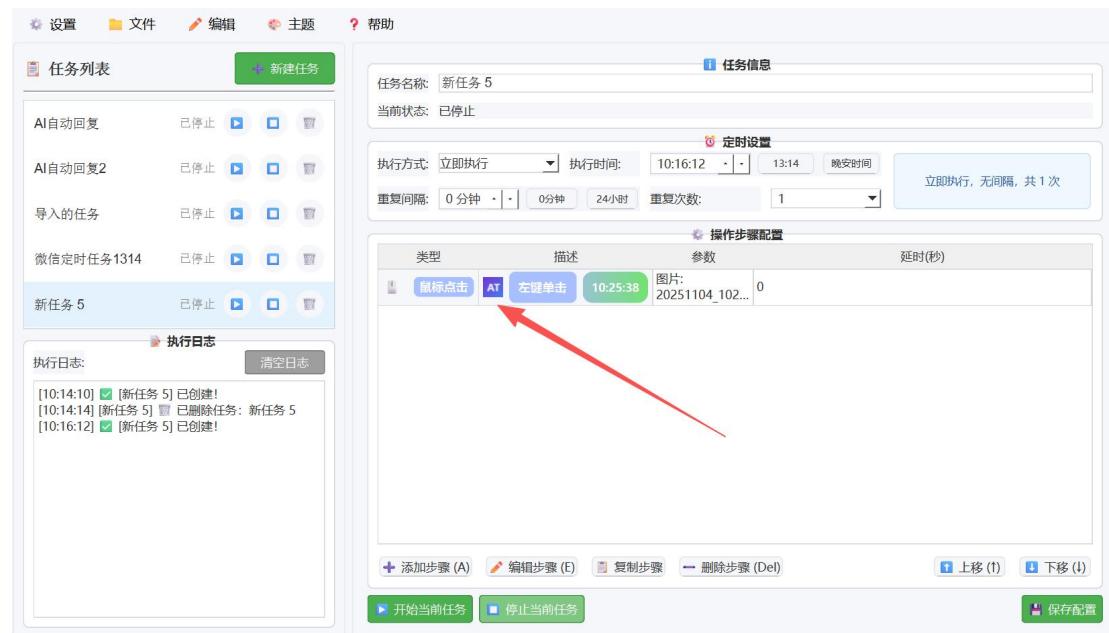

The "Configure Step" dialog box has OK and Cancel buttons at the bottom.

以鼠标点击为例

设置完成后点击 OK

配置列表中即可显示所配置的步骤 步骤是顺序执行 点击开始当前任务即可执行该配置

本界面主要用于重复简单的 windows 桌面任务，已经过实践可行的任务有：

- 自动发送微信消息（可定时）可扩展到任意桌面社交软件
- 自动回复微信消息（结合 AI）可扩展到任意桌面社交软件
- 批量发送内容的邮件（结合 excel 实现 可编辑目标邮箱和发送内容）
- 玩网页打地鼠游戏（可循环）
- B 站连续点赞 评论（通过鼠标滚轮实现连续点赞）
- 刷弹幕 任意平台
